

Table structure:

SD_ORDERS

intOrderid	int	id of the tables
intAnotherOrderId	int	int of table
intStatusId	int	statusid of the order

Calculation will be:

jjjjjj :

In case ggggg fabric:

In case ggggg = Pair then value = 2

In case ggggg = Piece then value = 1

In case tttttt fabric:

In case ggggg = Pair

In case Vitrage: $\text{ROUNDUP}(((\text{Width} * \text{eeeeeee}) + 12) / \text{size})$

In case Normal: $\text{ROUNDUP}(((\text{decWidth} * \text{eeeeeee}) + 20) / \text{size})$

In case ggggg = Piece

In case Vitrage: $\text{ROUNDUP}(((\text{Width} * \text{eeeeeee}) + 6) / \text{size})$

In case Normal: $\text{ROUNDUP}(((\text{Width} * \text{eeeeeee}) + 10) / \text{size})$
